Research Interests: Medical Robotics, Robotic Endoscopy, Vision-Language-Action Models, Embodied AI

EDUCATION

The Chinese University of Hong Kong

Aug 2024 – Dec 2027

— B.Eng. in Electronic Engineering, ELITE Stream

- CGPA: 3.374/4, MGPA: 3.552/4
- Selected coursework: Data Structures, C Programming, Digital Circuits, Electronic System Design.

RESEARCH EXPERIENCE

Robotics, Perception and Artificial Intelligence Laboratory, CUHK

Dec 2025 – Present

— Research Student Helper; Supervisor: Mr. Chi Kit Ng

- Work on vision-language-action models for robotic endoscopy, covering baseline evaluation, VLM/VLA fine-tuning, robotic perception, and anatomical-phantom validation.
- Develop multimodal pipelines linking endoscopic video, language instructions, robot states, motor commands, anatomical context, and experiment metadata for learning-based robotic control.
- Use Python, PyTorch, Qwen-based models, GR00T-style action architectures, ROS/ROS 2, STM32, CAN communication, motor control, and electromagnetic tracking.
- Collected 3,000+ manually curated endoscopic robotic samples for healthcare robotics dataset development, including OpenHDS-related data collaboration with NVIDIA.

SELECTED PROJECTS

EndoVLA-OOV — Open-Vocabulary Vision-Language-Action for Robotic Endoscopy

Medical Robotics

- Project on open-vocabulary perception, visual-language reasoning, and action-conditioned model behavior under endoscopic scenes; contributions include baseline evaluation, domain-specific data preparation, and model tuning.

Open-H Dataset

Healthcare Robotics Dataset Collaboration with NVIDIA

- Contributed high-quality manually collected endoscopic robotic data to support healthcare robotics dataset development and robot policy training research.

Exploring Continuum Robot Agents for Fire Rescuing in Buildings

Continuum Robotics

- Continuum robotics project for navigation and rescue assistance in structurally constrained building-fire scenarios; received recognition at the Hong Kong University Student Innovation and Entrepreneurship Competition.

PROFESSIONAL EXPERIENCE

TCL Technology Corporation — Project Assistant, Smartphone R&D

Jun 2025 – Jul 2025

- Supported smartphone R&D through prototype testing, technical documentation, defect analysis, and cross-functional engineering coordination.
- Executed 20+ functional tests across three prototype models, documented 8+ critical issues, and improved defect traceability during flagship-model iteration.

LEADERSHIP & TECHNICAL ACTIVITIES

Chung Chi International Association, CUHK — President

Apr 2025 – Present

- Lead a 15-member executive team and coordinate programme planning, student engagement, external communication, and event operations.
- Organized 10+ campus activities serving 1,000+ participants and launched a mentorship programme for 50+ international freshmen.

RoboMaster Team, CUHK — Member, Vision & Algorithms Group

Dec 2025 – Present

- Work on real-time robotic perception, object detection, target tracking, and deployment-oriented computer vision algorithms for robotic platforms.

AWARDS

EYE Award, Chung Chi College, CUHK

— Awarded in recognition of overseas exchange engagement and outstanding contributions to Chung Chi College.

Hong Kong University Student Innovation and Entrepreneurship Competition

— Award recipient for a continuum-robot agent project on constrained-environment rescue robotics.

TECHNICAL SKILLS

AI & Robot Learning: VLM/VLA fine-tuning, baseline evaluation, multimodal learning, robot policy training, Qwen-based models, GR00T-style action models

Computer Vision: YOLO, object detection, visual tracking, endoscopic image understanding, model-assisted annotation

Robotics & Embedded Systems: ROS, ROS 2, STM32, CAN communication, motor control, electromagnetic tracking, physical robot integration

Programming & Tools: Python, C, C++, Linux, Git, PyTorch, embedded development

Languages: Mandarin Chinese native; English fluent, IELTS 7.0; Cantonese fluent
